The pages of this book tell the story of the half century of growth and

development of the physician

assistant profession. Conceived at Duke

University in 1965, in response to a shortage of generalist physicians, the concept of the assistant to the physician was endorsed by the medical profession and embraced by the public. Growth was stimulated by the Federal government, leading to a rapid proliferation of training across the Nation. With the formation of a system of accreditation of training programs by the American Medical Association, and the development of a certification examination of graduates by the National Board of Medical Examiners, the concept was rapidly adopted by state legislatures until it became universal.

This book is a *rich resource* for educators to use when teaching the *history of the PA profession*.

It has ultimately taken a place as an integral part of American medical practice. The physician assistant has filled a void in access to care in underserved communities, and will play a vital role as 30

million newly insured patients enter the health care system under the Affordable Care Act.

The Physician Assistant: *An Illustrated History*

“The remarkable and worldwide **recognition of the PA profession** as a major source of medical care in all settings makes this book a very **important source of information**. It provides a documented timeline of the birth and development of the profession, and of the physicians, nurses, educators and pioneer physician assistants who believed in the profession, and by their diligence and foresight, made all of this possible.”

*E. Harvey Estes, Jr., MD
Former Chair and Professor Emeritus
Community and Family Medicine
Duke University Medical Center*

“This remarkable book **brings the Physician Assistant and MEDEX alive** through a detailed history and recognition of the leaders who made this new profession possible and so successful.”

*Richard Smith, MD, MPH
Founder of the MEDEX Program*
